

Rent or Share

Project idea generate

Rent or share project is about rent and share things through online based software. Here a person can rent something that he/she don't have but he/she need that item. Also one have extra things that he/she don't use, can share so that those who need that item can rent it. Like a person don't have his/her own car but he need a car to go one place to another. So now the person can search for car rent in this software and if that available then he/she can rent the car by spending valid money. That's how using this system people around you can be benefited.
